Locking System

A

Locking Point

B

Roller Catch Bracket

C

Gear System

The Nova Rack is equipped with a high quality, four-point Roller Latch Locking System, which is manufactured in and imported from Germany.

The Hinging System is manufactured in 3.0mm Mild Steel, and allows for an easy-lift off system in the open position.

This combination of the Locking and Hinging System offers a very secure locking system, versus a single point locking system.

Thus, the locking mechanism is spread over the length of the door in four separate places.
